\*\*All heater cores have <sup>5</sup>/<sub>8</sub>" O.D. inlet and outlet nipples unless noted.

1. Height of coil is measured along the fin.
2. Length of coil is the fin segment between header plates.
3. Width is coil dimension; e.g. 4 rows of tubes is 2 <sup>1</sup>/<sub>2</sub> inches.

# TYPICAL A/C PLUMBING SCHEMATIC

Air Conditioner components are connected together to illustrate system operation. The components shown are not to scale. The refrigerant and refrigerant oil are clear in color and not visible in this drawing; however, we've attempted to suggest temperature variants through the use of values of gray in the pipeline. The small arrows inside the components and connecting hoses show the direction of refrigerant flow (refrigerant circuit).
